A Native-Cloud Suite of Integrated SaaS Energy Management Products

FEATURES FOR LARGE CORPORATE CONSUMERS

DATA MANAGEMENT

Manage all your energy data in a single cloud platform, equipped with lots of easy-to-use tools to check the completeness and accuracy of your data.

CENTRALISED ESTATE PORTAL

Cut over 67% of admin tasks by centralising access on one platform. No more spreadsheet exchanges. Enjoy unlimited users access with customisable visibility for streamlined estate-wide data sharing.

INTEGRATED PLANNING TOOLS

Leverage bill validation, energy analytics, and procurement tools for effective planning and management. Our Energy.Hub facilitates understanding of energy usage and performance.

EFFICIENT SAVINGS AUTOMATION

Implement robust automation to ensure delivery of identified savings. Set up alerts and triggers to monitor energy processes. Automate reports for customers and service providers.

ABOUT US

Since 2012, Utilidex has been a leader in energy software, launching the industry's first digital platform with integrated SaaS products for corporates, suppliers, and consultants.

WHY CHOOSE US?

Utilidex is dedicated to solving energy and carbon related issues through collaboration between customers and suppliers, while prioritising user-friendliness and efficient onboarding. Further we are here to support our customers and their client's energy transition reducing carbon consumption and cost.
