

# A Native-Cloud Suite of Integrated SaaS Energy Management Products

## ENERGY SUPPLIER FEATURES

### AUTOMATED DATA-DRIVEN SETTLEMENT

Automatically compile the energy rate based on customer contracts, energy and green certificates, market indices, network charges, residual or shape cost and, of course, meter data

### FINANCIAL SYSTEM INTEGRATION

Connect your financial systems to reduce manual processes and automate bills, statement and accruals directly with no manual interventions

### ACCELERATE BILL PROCESSING

Check customer consumption data at any granularity, pre-check tariffs and rates are correct, generate monthly bills in a few clicks and automatically send directly to customers

### BILLING ADJUSTMENT AUTOMATION

Automatically generate bill adjustments and reconciliations with a rigorous audit trail of all historical data with the ability to add explainers to further promote transparency with customers

## ABOUT US

Since 2012, Utilidex has been a leader in energy software, launching the industry's first digital platform with integrated SaaS products for corporates, suppliers, and consultants.

## WHY CHOOSE US?

Utilidex is dedicated to solving energy and carbon related issues through collaboration between customers and suppliers, while prioritising user-friendliness and efficient onboarding. Further we are here to support our customers and their client's energy transition reducing carbon consumption and cost.
